Connect where you want, when you want!

Blue Mobile offers mobile broadband options to allow you to connect your devices to the Internet wherever you are. Two options are currently available and connect in different ways.

- The Blue Mobile 3G Mi-Fi Data Card acts as your mobile hotspot, connecting up to five simultaneous devices to the Internet wirelessly, similar to the way you connect to other Wi-Fi hotspots or to a wireless router used in your home or office.

- You can also choose a 3G USB Data Card to connect. The Data Card connects to your device through an available USB port, which then connects your single device to the Internet.

Choose the plan that is right for you!

Mobile broadband plans through Blue Mobile are tiered for the needs of each user. For those needing light connectivity while away from the desk, the 500MB plan is probably right for you. The higher tiers like our 5GB plan offer connectivity for those frequent travelers or those in need of constant access. Plans can be changed at anytime to fit your needs.
